

Proposed Pipeline

Automatic extraction of most relevant patches for class prediction using CLAM

FM

Z_1 
 Z_2 
 Z_3 
 Z_4 

$\tilde{y}_1$ 
 $\tilde{y}_2$ 
 $\tilde{y}_3$ 
 $\tilde{y}_4$ 

- 1) Constant Embedding Size
- 2) Label Prediction
- 3) Label Filtering

Yottixel-K Pipeline

Choose

- 1) k_{CH} (number of color clusters)
- 2) p_M (percentage of patches to build the mosaic)
- 3) m_c^x (clustering magnification)
- 4) m_x^{idx} (indexing magnification)

Yottixel-K
